Introduction

By default, Prestashop displays only one of both prices (tax incl. or tax excl. according to the settings of your shop).

This module allows you to display the missing tax in your categories of products, and in your products details, so you can **displaying both the price tax incl. AND the price tax excl.**

Customize the display of the price (ONLY FOR PRESTASHOP 1.7)

This settings allows you to customize the price added by our module.

Note : you can't customize the original price displayed/managed by PrestaShop and your theme.
Only the second price which added by our module is concerned by these options.

Basics features

Two parts of settings are available.

You can customize the display of the price independently in the categories of products and products details. That means you can, for example, choice a color for the categories, and an other color the products details :

- Show in categories of products/products details: activate the display of the price
- Color : change the color of the price and the label price
- Size : concerns the size of the price AND the label of the tax
- Display the tax label: displays the label of the tax (tax incl or tax excl according the settings of your shop)

These settings of customization only concern the price displayed by our module. The appearance of the first price displayed by PrestaShop is supposed to be managed by your theme.

Special features

Display the label of the first tax in products of categories(only in products categories)

SETTINGS OF CATEGORIES OF PRODUCTS

Show in categories of products ☐ YES ☐ NO

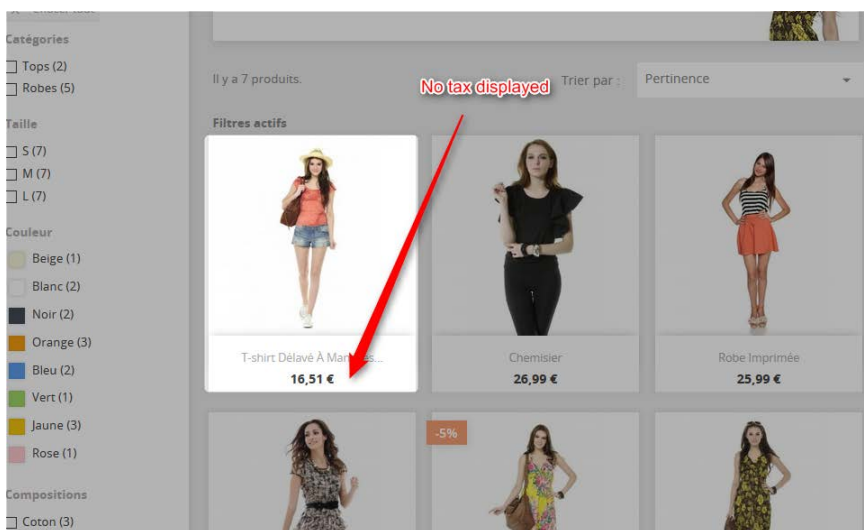

Color in categories of products: #4200bc 

Size of the price in categories of products (default : 15) 20 

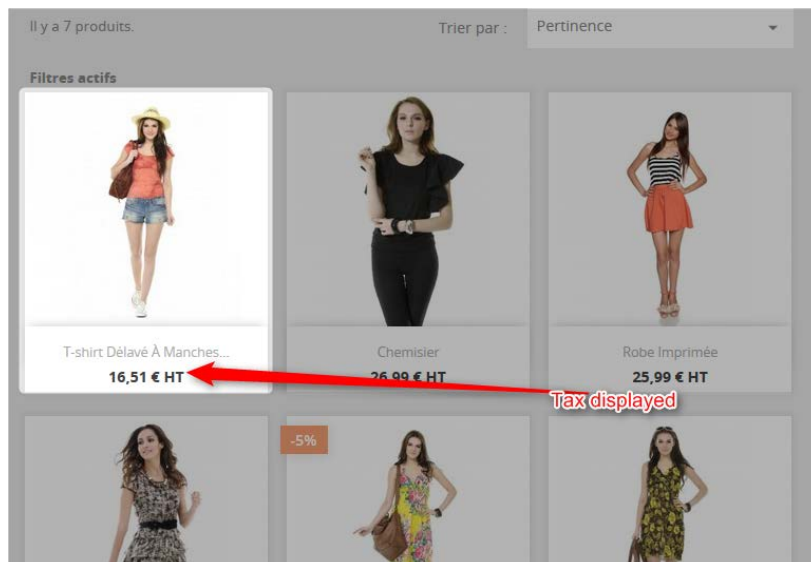

Display the tax label in products of categories ☐ YES ☐ NO

Display the label of the first tax in products of categories ☒ YES ☐ NO

In a clean Prestashop version, the label of the tax is not displayed (tax excl and tax incl) in the categories of products.

This setting allows to solve this problem.
Look at what happens when we enable it :

You can obviously use this setting with the others, or not. You can make all the combinations you want. You have the choice to display this label of tax independently of the rest of settings.

Margin with the previous block (must be an integer) (only for products details)

SETTINGS OF PRODUCTS DETAILS

Show in products details ☒ YES ☐ NO

Color in products details #150100

Size of the price in products details (default : 15) 20

Margin with the previous block (must be an integer) 5

Display the tax label in products details ☒ YES ☐ NO

This setting increase/reduce the space between the first displayed price block and the second price block (added by the module) in your product details.

Accueil / Femmes / Tops / T-shirts / T-shirt délavé à manches courtes

T-SHIRT DÉLAVÉ À MANCHES COURTES

16,51 €

HT

19,81 € TTC

Marge = espace entre les deux blocs

T-shirt délavé à manches courtes et col rond. Matière douce et extensible pour un confort inégalé. Pour un look estival, portez-le avec un chapeau de paille !

Translation of the labels taxes (PRESTASHOP 1.7)

The translation of the labels taxes is available with all the languages installed on your shop. You can set them directly in the module configuration.

* Tax included label	<input type="text" value="TTC"/>	<div>fr ▼</div> <div>Français (French) English (English) Català (Catalan) Español (Spanish) Galego (Galician) Euskera (Basque)</div>
* Tax excluded label	<input type="text" value="HT"/>	

Multishop

This module is perfectly compatible with the multishop mode.

So you can choose some options for one shop, and others options for another one. This is useful if you have for example one shop B2B and another B2C.

Reversing the prices

If you want to reverse the display of the price (showing the tax excl price before the tax incl price, or the reverse), you have to make a configuration in your shop.

Prestashop < 1.7 :

Backoffice -> Customers -> Groups

For all specified groups, you have to click on « Edit », and choose the first price displayed in the « Price display method » option.

Prestashop >= 1.7 :

Backoffice -> Settings of shop -> Customers -> Groups

For all specified groups, you have to click on « Edit », and choose the first price displayed in the « Price display method » option.

The screenshot shows the PrestaShop backoffice configuration page for the 'Visiteur' group. At the top, there are three tabs: 'Customize your shop', 'Add products', and 'Configure'. Below the tabs, a blue banner reads 'Take a tour: get started with PrestaShop' with a welcome message to 'Baptiste'. The main configuration area includes a language dropdown set to 'fr', a 'Nom' field with 'Visiteur', a 'Remise' field set to '0.00 %', an 'Affichage des prix' dropdown set to 'TTC', and an 'Afficher les prix' toggle set to 'OUI'. There is also a 'Réduction sur une catégorie' section with a button 'Ajouter une réduction sur une catégorie'. At the bottom, there are sections for 'Modules autorisés' and 'Partage sur les réseaux sociaux' with a toggle set to 'OUI'.

Support

If you have a problem using the module, feel free to contact us.

We have a team able to answer you quickly whatever your question :
